

Minfos 4.2.3

Welcome to Minfos 4.2.3

This document provides an overview of the enhancements and support issue fixes in this Minfos release.

In this release:

- Stocked status is now displayed in the Promotion detail error list in the new promotion module
- Prices higher than \$999.99 can now be printed on shelf labels
- When ordering, the Max Shelf Hold prompt will only display when exceeding the Max Shelf Hold

How to update Minfos

1. At any point in the day, download the latest Minfos software.
 - a. On the Minfos Launch Pad, click the **File** menu, and select **Minfos Net Terminal**.
The Minfos Net Terminal window is displayed.
 - b. Click the **Connect** menu, and select **1. Internet**. The Online Menu is displayed.
 - c. Check the **1 New Minfos Software** check box, then click **Okay**.
2. When you're finished trading for the day, ensure there are zero connections to your Minfos server.
Your Minfos software will update automatically, overnight.
3. Check that your Minfos software successfully updated. On the Minfos Launch Pad, click the **Help** menu, then click **About Minfos Software**.
The About Minfos Software window is displayed and shows your current Minfos version in the **Applications Versions** box.

Enhancements

This section provides details about enhancements in this release.

Dispense

Script Enquiry window is now available under the Dispense menu

Stock Manager

Making a price change for a product on promotion no longer results in an incorrect promotion price

When running the old Minfos Promotions module, retail price changes are not enabled from **Price Manager**. This ensures the promotional price of the product is not affected.

Promotions

Stocked status is now displayed in the Promotion detail error list

The **Promotion detail error list** now displays the stocked status of each product in error, allowing stock controllers and retail managers to easily identify stocked products and action them.

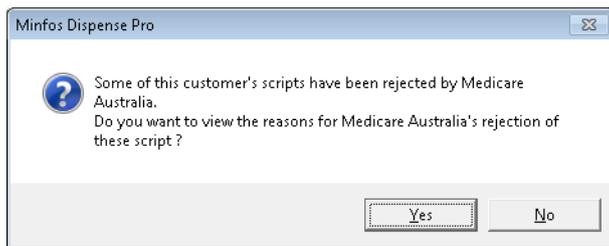

Barcode	Product name	Promo code	Promo name	Error type	Error description
9300673452481	PANADOL CHILD 1-5YR C/FR 200ML	1160907	Minfos Test 1	COST_WRN	Promotion price is less than cost pri

Support issues resolved

This section provides details about support issues resolved in this release.

Dispense

- The prompt to view PBS error notes now only appears when a customer is selected

- Minfos now prompts to issue a Safety Net card when a Concessional Repatriation Patient has reached the Safety Net threshold
- It is no longer possible to apply a co-payment discount to a CTG Concessional script with a Brand or Therapeutic Premium
- The **Drug Database** navigation buttons now work as expected

Stock Manager

- Prices higher than \$999.99 can now be printed on shelf labels
- The **Product Info tab** in Product Maintenance can now support up to 30000 characters
- The **Stock Out Report** can now be exported as a PDF file
- When a store has FIFO enabled and decreases the stock on hand of a product, the **Stock Variance Report** will now use the FIFO cost price instead of the last buy cost price
- When ordering, the Max Shelf Hold prompt will only display when the Max Shelf Hold value is exceeded
- The summary at the end of the **MNPN Updates Report** now has correct formatting, preventing character overlap
- Collecting a wholesaler update no longer clears the maximum shelf hold quantities set by the store

Till

- Deleting and re-dispensing a script that has been put on hold at the till, no longer results in a duplication of scripts
- MYOB export now extracts sales with the correct date

Reporting

- The displayed year in the **Category Sales Report** now updates when running the report for a 24 month period

Multistore

- Shelf Pack, Min Order Qty and Order Multiple values are now updated as expected from H/O to slave stores

Promotions

- The Product Name column in the **Promotion Sales Report** no longer overlaps the Qty column
